

CMPT 276 – Prison Escape Group Project

Spring 2026 – Group #10

Group Members: Tarnjot Aujla, Arsh Behniwal, Dominic Janus, Jagdeep Sidhu, Nick Zhou

Communication

- Team will communicate using Discord
- All major decisions must be discussed in the group chat
- Members are expected to respond to messages within 24 hours
- If unavailable due to any circumstances, members must notify the rest of the team in advance
- In the case of any conflict, we will try to discuss the issue as a group, and prioritize project requirements over personal preference; we will hold a group vote if necessary

Meetings

- The team will meet 1-2 times per week online via Discord for 30-60 minute sessions
- Additional meetings may be scheduled ahead of major deadlines
- Each meeting will include progress updates, distribution of tasks, project discussion, code review, and more
- If a member cannot attend a meeting for whatever reason, they must inform the team beforehand and review meeting contents afterwards

Roles & Responsibilities

- All tasks will be distributed evenly between members based on complexity and integration with other components
- Each member will take primary ownership of a specific component of the project, but all members will contribute to testing, debugging and integration between components
- All members are expected to write clean, well-structured code, participate in code reviews and understand the overall system design

Work Standards & Deadlines

- Members must commit regularly with clean, well-structured code with comments
- Major changes should be submitted via pull requests when appropriate
- Aim to complete major features **at least 2 days before deadlines**

If a group member is not actively contributing:

- The team will first try to address and resolve the issue to understand any circumstances
- A clear action plan will be agreed upon to move forward
- If lack of contribution continues, responsibilities may be redistributed amongst other members and if hindering project progress, consistent lack of activity may be reported to the professor

If a group member misses a deadline:

- The member must notify the team as soon as possible, and a short extension may be granted
- Repeated missed deadlines without reasonable circumstances will result in documentation of the issue and can potentially affect peer evaluations
